Summary

I am a motivated customer service worker and student at Western Governors University. I am studying for my Bachelor's degree in software engineering. My focus has been on web development, program planning and game design. I am looking to start a new career with technology.

Skills

HTML, CSS, JavaScript, c#, git, Microsoft Word and Excel, SQL, debugging, project planning,

Projects

3D Evolution simulation game

- Simulated plants growing and spreading in the scene using the Unity game engine
- Created 3D models with Blender and imported them into the game assets.
- Dynamically altered the scale and mesh of plants based on dna values to show evolutionary change.
- Optimized systems to reduce lag and poor performance when there was 1,000 or more plants in the scene.

Experience

Walmart associate. from 12/2024 – current

- Assisting customers with diverse backgrounds, various need, and language barriers.
- Working in apparel, front end, and in digital order filling.
- Recognized for my great attitude and consistently engaging with customers.
- Working in teams to accomplish various tasks.

Publix Super Market produce associate. 02/2022- 02/2023

- Unloaded the truck, unboxed new merchandise, and restocked shelves to promote items.
- Maintained knowledge of sales and promotions. Set up displays accordingly.
- I greeted customers and offered to help locate produce items.
- Received and unloaded new products upon delivery, checking for damage and order accuracy.

Education

Hillcrest High School. High School Diploma earned in 2018.

Currently enrolled at Western Governors University for a Bachelors in software engineering. Expecting to graduate June 2027.
